

U S E M B A S S Y

On November 19, 2020, a group of 60 students including 12 students from MUIC's Social Science Division led by Ms. Pattaka Sa-ngimnet attended an in person/virtual hybrid event at Education USA. The students are perspective law students and were welcomed by US ambassador, Michael George December who encouraged the students to pursue a law degree. He explained how his degree had opened doors for in both the legal and foreign service fields. Law is a productive field for IRGA graduates as well as diplomacy and foreign service. Students found the event encouraging and useful for both their present studies and their future career goals. Students were also encouraged to apply for Fullbright scholarships to pursue law careers as the Fullbright foundation is now giving out such scholarships and are interested in attracting qualified Thai students. Both the Fullbright foundation and the US embassy are interested in partnering with MUIC to hold events to benefit students in the near future.
