

INTERNSHIP EXPERIENCES

CHATTIYAKORN SAMREJSUK

ORGANIZATION: THE BELGIAN-LUXEMBOURG/THAI CHAMBER OF COMMERCE
POSITION: PROJECT INTERN

What I have learned is that this is a non-profit organization, so we have to be delicate when it comes to plans, budgets, and events. The executive director is pretty much open-minded so I'm not worried much. Our working hours can be flexible sometimes, for example, if we hosted or co-hosted the event on that day, the next day we can work from home. My achievements would be that I got my hands on many tasks, I handle the social media channels, the website of the BeLuThai, contact with members, and help organizing the events. My goal is trying to make the organization gain more audience on social media and trying to improve everything as much as I possibly can. Today (25th January 2023) we also host the event called "BeLuThai New Year Party 2023" with some help from people from European Chamber of Commerce Thailand, I have learned a lot from today by also attending the board meeting and taking notes of everything.

Then, we have a New Year Party at Amari Watergate Bangkok and I have met a lot of business people, so I would say this is also my achievement. I barely have the dissatisfactions. However, I feel like there are many things that can be improved, especially the social media channels, because we are the medium size chamber of commerce, so our performance still has to reach more audience. I think the way that the current intern handles the social media channels can be better than this, but I still do things the way she does as I still have less experience. Overall, I want to understand more and get my hands on more tasks and responsibilities as I'm still not familiar with the members in our chamber. I'm sure that I will improve my performance and self-development once I learned more stuff.
