

INTERNSHIP EXPERIENCES

KANTANAT THAWORNPRACHA

ORGANIZATION: PTT PUBLIC COMPANY LIMITED

DEPARTMENT: EASTERN ECONOMIC CORRIDOR OF INNOVATION (EECI)

POSITION: GENERAL STAFF

From what I have learned so far, I can say that I have learned many new things from my supervisor and my colleagues. For the task I am given, I have been assigned to do the overall view and summarise the existing PTT project in Rayong, named Smart City in Wangchan Valley. This project aims to develop an innovative and smart city that covers 7 categories, such as Smart People, Smart Living, Smart Energy, Smart Environment, Smart Mobility, Smart Economy, and Smart Governance. I am surprised that there is such a smart city in our country; however, the smart city project by PTT is only allowed in a regulatory sandbox. Plus, I am told that I will be assigned to go to Wangchan Valley in Rayong to see the actual project someday. Moreover, every 2 weeks, I have to attend the meetings and report what I have done in the past week to executives, managers, supervisors, and my colleagues for progress.

My satisfaction during the first 2 weeks here can be said that I have totally satisfied with everything, such as management, working environment, colleagues, as well as the location that is surrounded by a market and coffee shops. However, what I am most satisfied with is my colleague because he is so friendly and talkative. He is also my problem-solver every time I encounter some issues.
