

# Learning Management System

ACCESS FROM ANYTIME ANYWHERE

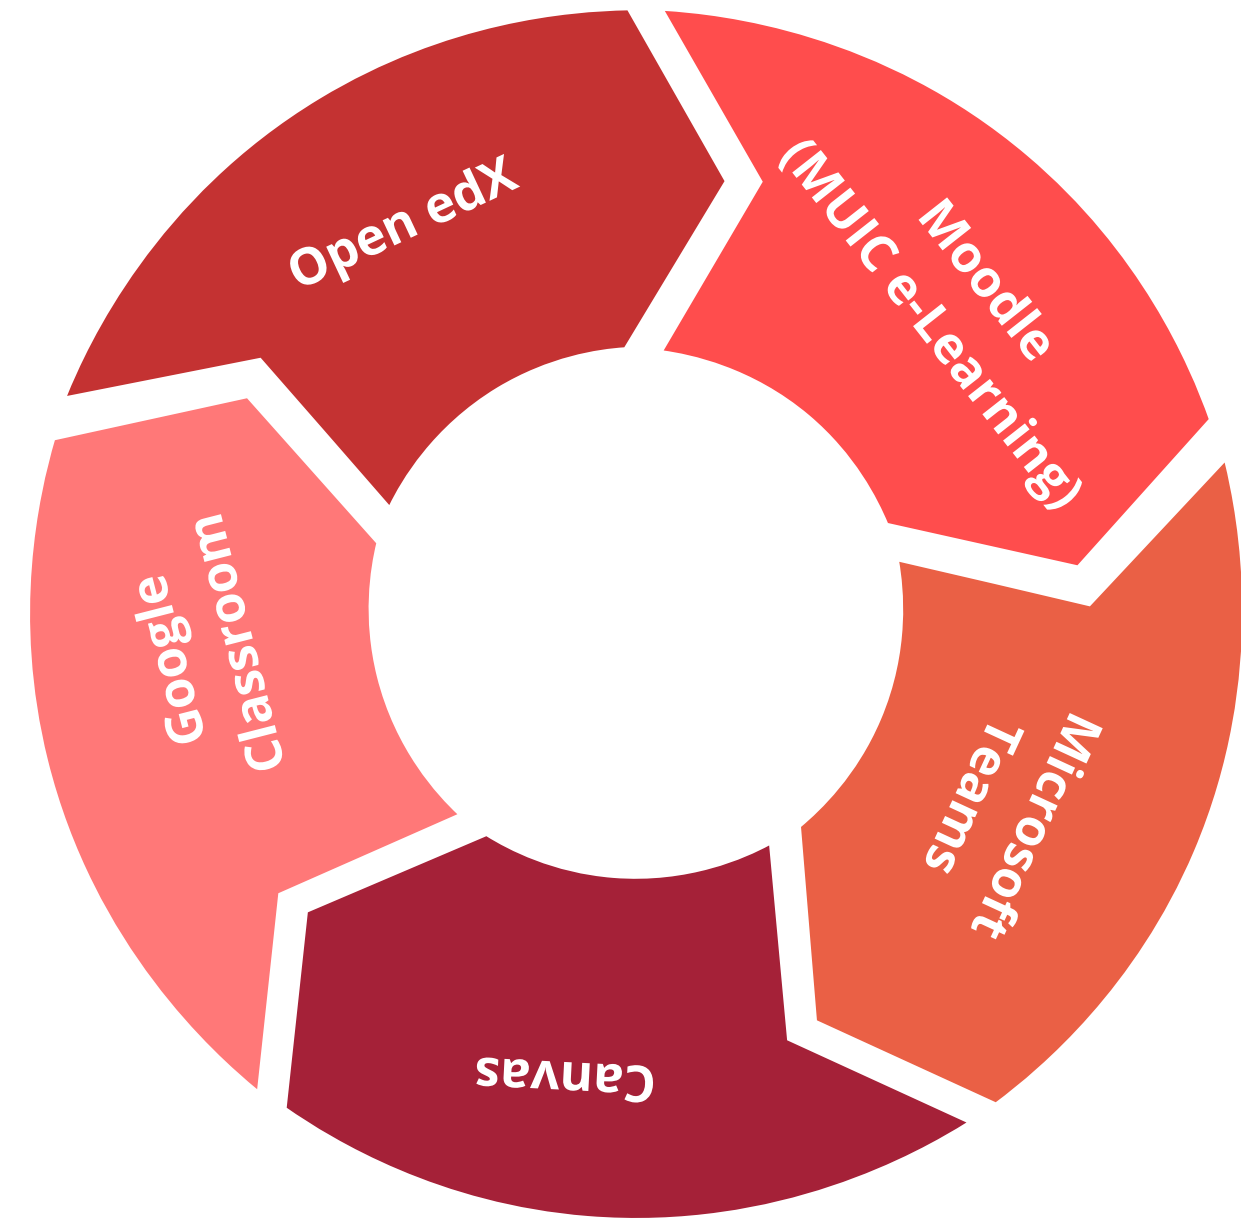

A BRIEF GUIDE TO LMS

# Learning Management System

## INTRODUCTION

*"...LMS acts as a centralized database of all educational data where you can store course materials, assessments and more in a single location that students can access from anywhere across devices..."*

# LMS

01

## Moodle (MUIC e-Learning)

*...a free and open-source software that allows users to customize features to suit their needs. Learners are provided with a personalized environment and variety choices of learning activities...*

02

## Google Classroom

*...a virtual classroom environment that provides a teacher/student-friendly way of communicating and managing documents quickly and effectively. It allows users to use services like Google Drive, Google Docs, Google Calendar, Forms and other services in G Suite to create and store documents...*

03

## Microsoft Teams

*...a collaboration platform that works as a central hub with features such as chat, voice, video and file sharing. Its power lies in users' ability to work together through multiple different channels ...*

04

## Canvas

*...offers discussion boards, chatrooms for live discussion, and also centralized email – an effective way to interact with students, submit assignments and take exams. Teachers can create an interactive password-protected virtual classroom where students submit works and communicate with their classmates...*

05

## Open edX

*...offers a great level of flexibility and user-friendly platform with a large supportive community. It features two products: the LMS platform for managing the course and the Studio for creating the content. Not only all the functionality is provided without cost, its ability to run a high stability class with large audiences and to easily integrate with almost any third-party modules and tools...*

# The Benefits of *LMS*

## Teaching

- Track the learning
- Offer centralized platform for teaching & learning activities
- Facilitate class materials distribution
- Provide diverse communication channel options

## Learning

- Prompt retraining
- Engage learners
- Support e-Learnings tools' integration
- Promote life long learning

## Feedback

- Generate instant Audit Report
- Provide transparency on assessments
- Save time & cost
