

# Health & Wellbeing

Health – a basic social need that accounts for approximately 10 per cent of the global economy – presents multidisciplinary challenges that calls for innovative and cost effective technological, managerial, and legal solutions.

The goal of the research theme for Health & Wellbeing is to bring together a critical mass of expertise in 10 research themes, addressing these challenges:

- Healthcare Management
  - Medical Informatics
    - Medical Law
- Digital Health and Wellness
  - Aging Society
- Health Policy and Analytics
  - Medical Tourism
- Health Technology Assessment (HTA)
- Intellectual Property in Health
  - Health Economics
